

## **BIG Question: How can we take care of the world's animals?**

This term we are going to be exploring the seven continents. We are going to learn what a Geographer is and how important they are. We will be looking at the seven continents, comparing their size and location on our planet. We will virtually fly across the world, exploring populations, animals, landmarks, foods and landscapes, so get your passports ready.

Our key text for this term will be Beegu which is a lovely tale about an alien who finds herself on Earth. We will be learning this journey tale through the approach of Talk4Writing and will later adapt the original story to invent our own. We are also excited to be building on our Oracy through performance poetry based around the King's Coronation.

In Science we will be exploring our Animal Kingdom. We will be learning about living things and the features of living things, including vertebrates and invertebrates. This links beautifully with our Art project of making birds. A sculptural project beginning with making drawings from observation, exploring media, and transforming the drawings from 2d to 3d to make a bird.
