

BIG Question: How does life in prehistoric times influence our lives today?

During this topic, the children will be learning about and investigating the lives from the Stone age to the Iron age. We will also compare the Stone age and Iron age to modern day life.

Children will be introduced to the idea that people have been living in Britain for a very long time. They can learn about the changes that occurred in Prehistoric Britain and study the features of and developments within the Palaeolithic Era, Mesolithic Era and Neolithic Era.

Children will be able to identify how animals and plants are adapted to suit their environment in different ways and that adaptation. They will define an adaptation and understand that adaptations are not a 'choice'. The children will also learn a range of common adaptations.

Practise at Home:

Children are expected to read EVERY night. They are now expected to know their times tables (2, 5, 10, 3, 4, 8) if they don't, they must continue to practise.

They will have IXL homework on Mondays to be completed by the following Monday.
